FUNDING FOR YOUR DEVICE

Funding can seem like a big hurdle, but our dedicated funding staff works behind the scenes to make your experience as easy as possible. Each funding case is specific to the individual, but we'll show you the basic steps so you get an idea of the roadmap to your new device.

SOLE PROVIDER

Control Bionics is the sole provider of our devices, making it easier to apply for in-network funding options no matter where you live. Our funding team will work with your insurance to get you the device you need with the lowest cost to you possible.

DEDICATED STAFF

Our funding team knows the ins and outs of the confusing insurance landscape, and you can trust that they will go through the proper channels to get your device to you as fast as possible.

SAFETY CHECK

Our funding specialists double check with your insurance and make sure you are eligible before any device is shipped. You'll never receive a device without knowing your funding is covered.

Our team knows the importance of life-changing connections, which is why we manage the hard work behind the scenes so you can focus on what matters most. We offer funding through Medicare, Medicaid, the Veterans Health Administration, private insurance, and various education systems.

Once your team confirms the device is right for you, they will get your basic information, like client information form, assignment of benefits, and insurance card.

And that's all we need from you to get started! You can rest easy knowing the funding specialists are handling the next steps in the process.

STEP 1
1
VERIFY
The specialist will check with your insurance to make sure there are no initial exclusions and if they require a trial to get your device.
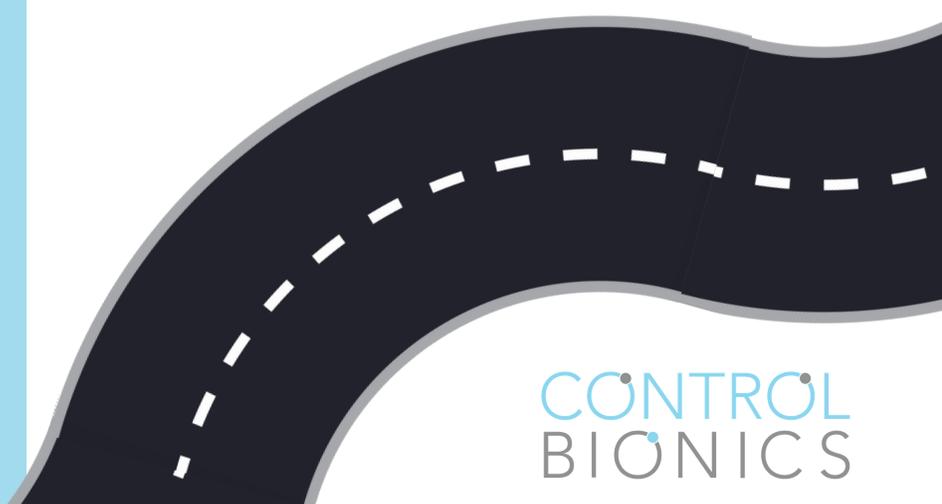

STEP 2
2
COLLECT & SUBMIT
Once the specialist has the SLP report, doctor's prescription, and prior authorization (if necessary), they submit to your insurance. Approval takes about 30-45 days.

STEP 3
3
FINAL CHECK
Once insurance approves your device, the specialist will confirm all paperwork is complete and the production will start prepping your device.
